

Automotive Power Clamp Cover

The Challenge:

The automotive industry utilizes thousands of power clamps for dozens of manufacturing operations. These power clamps are often exposed to hostile environments including weld splatter that can cause severe damage. The result is that countless hours of production time are lost each shift to repair or replace these damaged clamps.

The Worbo Solution:

Utilizing Worbo's Molten Splash-Away™ (MSA) technology a protective splatter resistant cover is installed. The smooth barrier cover repels weld splatter and the clamp remains in pristine condition. The MSA cover is equipped with a Velcro® type closure for easy

installation and removal. This simple and cost effective application results in thousands of dollars in increased productivity.....Whatever your weld splatter protection needs are our engineering and manufacturing team here at Worbo will find the solution!
